

SUREFORCE **DF1** Digital Dynamometer

For accurate measurement of electrode force on Resistance Welding machines

*Approximately
actual size*

*Correct electrode
force is vital for
quality spot welds*

- Internal batteries (4 x AA type 1.5v)
- Auto Power Off (Time adjustable)
- Accuracy - 0.02% FSD
- Measures Electrode Force which can be read as kN, daN, N, t, kg.
- Digital readout with additional analogue bar indicator
- Low profile insulated sensor only 18mm thick.
- Fabricated in stainless steel.
- Programmable functions include digital filter (read rate), zero reading, peak reading and resolution.
- Error indicators for positive or negative overload, force outside selected scale and batteries low.
